CONTENTS

Foreword vii

Chapter 1. Electron scattering and few-nucleon systems
B. FROIS 1

Chapter 2. Occupation probabilities of shell-model orbitals
G. J. WAGNER 17

Chapter 3. Photoexcitation of low-lying, isovector 1^+ states in deformed nuclei
U. KNEISSL 41

Chapter 4. Nuclear response in an extended RPA formalism; an application to ^{48}Ca
M. G. E. BRAND, K. ALLAART and W. H. DICKHOFF 61

Chapter 5. Recent advances in the spin–isospin nuclear responses
A. De PACE and A. MOLINARI 71

Chapter 6. Algebraic description of intrinsic modes in nuclei
A. LEVIATAN 85

Chapter 7. Observation of nuclear giant resonances in photon scattering and photon absorption experiments
B. ZIEGLER 95

Chapter 8. Electron scattering with polarized beams and ^3He-targets
E. W. OTTEN 103

Chapter 9. Polarized gamma-ray beams by inverse Compton scattering
D. BABUSCI, L. CASANO, A. D'ANGELO, P. PICOZZA, C. SCHAERF and B. GIROLAMI 119

Chapter 10. The response function of nuclear matter
I. SICK 141

Chapter 11. Electron scattering from the three-nucleon bound states
P. U. SAUER 155

Chapter 12. Hard pion exchange currents and the backward deuteron disintegration
E. TRUHLIK and J. ADAM, JR. 169

Chapter 13. Parity-violating electron scattering
T. W. DONNELLY 179

Chapter 14. The Mainz microtron facility MAMI
TH. WALCHER 189

Chapter 15. Are nuclei strongly correlated Fermi liquids? Empirical evidence from (e,e'p) spectral functions
P. K. A. DE WITT HUBERTS 205

Chapter 16. The Continuous Electron Beam Accelerator Facility: Project status and physics outlook
H. A. GRUNDER 219

Chapter 17. Neutral pion production at threshold and low-energy theorems
R. DAHM and S. SCHERER 237

Chapter 18. An introduction to nucleon resonances
M. M. GIANNINI 253

Chapter 19. The nucleon as a projected chiral soliton: Vacuum and medium properties
M. FIOLHAIS, E. RUIZ ARRIOLA, P. ALBERTO and CHR. V. CHRISTOV 283

Chapter 20. The study of baryon resonances by real photons
G. ANTON 303

Chapter 21. Baryon–baryon interaction in the quark model and the H-dibaryon
A. FAESSLER and U. STRAUB 323

Chapter 22. The one-gluon exchange current and the electromagnetic properties of the deuteron
A. BUCHMANN, Y. YAMAUCHI and A. FAESSLER 333

Chapter 23. Quark versus mesons in nuclear force and nuclear currents
K. YAZAKI 353

Chapter 24. The internal spin structure of the nucleon
K. RITH 363

Contents of Some Previous Volumes 379
